

RANGE SHIPPING

DESIGN POSITIONING TEMPLATE

STEP 1 — MOODBOARD & DESIGN DIRECTION

Project Overview

Range Shipping is a London-based dry bulk shipping company operating globally within the dry bulk market.

The purpose of this exercise is not to design pages or website layouts.

The purpose is to establish the visual identity, mood, atmosphere, and creative direction that will guide the entire website redesign.

The final website should inspire confidence among charterers, shipowners, commodity traders, brokers, investors, and business partners.

Visitors should immediately perceive Range Shipping as a serious, capable, globally active commercial operator.

Brand Perception

When someone lands on the website they should feel:

- Confidence
- Trust
- Stability
- Scale
- Professionalism
- Global Reach
- Commercial Expertise
- Modern Thinking

The company should feel larger than its physical size.

The company should feel connected to global trade and international commerce.

Brand Personality

Primary Traits:

- Trusted
- Global
- Professional
- Reliable
- Established

Secondary Traits:

- Modern
 - Intelligent
 - Efficient
 - Sustainable
 - Commercial
-

Not This

The website should NOT feel:

- Startup-like
 - Tech bro
 - Luxury yacht brand
 - Generic logistics company
 - Traditional shipping company
 - Old-fashioned corporate website
 - WordPress template
 - Government institution
-

Creative Direction

Range Shipping should feel like:

"A sophisticated global trading and maritime business operating at the centre of international commerce."

The focus should be on movement, connectivity, scale, trust, and professionalism.

The visual language should communicate capability rather than complexity.

Colour Direction

The existing company logo should be the foundation of the visual identity.

Primary Colour:

Deep Maritime Navy

Themes:

- Trust
- Stability
- Professionalism
- Authority

Secondary Colour:

Ocean Blue

Themes:

- Movement
- Shipping
- Global Operations

Accent Colour:

Muted Teal

Themes:

- Innovation
- Sustainability
- Modernity

Supporting Colours:

- White
- Soft Grey
- Steel Grey

Avoid:

- Bright blues
- Orange accents
- Neon colours
- Highly saturated palettes

The overall website should feel predominantly navy blue.

Photography Direction

Photography should feel:

- Cinematic
- Global
- Atmospheric
- Large Scale
- Premium

Preferred Subject Matter:

- Open ocean
- Bulk carriers
- Global trade routes
- Ports and terminals
- Maritime infrastructure
- Aerial perspectives
- International commerce

Avoid:

- Handshake imagery
- Smiling office teams
- Generic stock photography
- Overly staged business scenes
- Small-scale vessel imagery

The focus should be on scale and global presence.

Typography Direction

Typography should feel:

- Confident
- Modern
- Premium
- Corporate
- Clean

Visual Characteristics:

- Strong headings
- Clear hierarchy
- Excellent readability
- Minimal clutter

The typography should resemble premium financial, logistics, and enterprise brands.

Design Language

The visual system should feel:

- Minimal
- Refined
- Sophisticated
- Structured
- Calm
- Intentional

Use generous spacing.

Use strong hierarchy.

Use simplicity rather than decoration.

Avoid visual noise.

Motion Philosophy

Do not design animations yet.

Instead establish how motion should feel.

Motion should be:

- Smooth
- Controlled
- Purposeful
- Premium
- Subtle

The experience should feel polished and high-end rather than flashy.

Sustainability Expression

Sustainability should feel integrated into the company rather than added as marketing.

Visual expression should focus on:

- Responsibility
- Efficiency
- Long-term thinking
- Operational excellence

Avoid obvious environmental clichés.

Avoid excessive green imagery.

Competitive Inspiration

Generate three moodboard directions.

Concept A: Institutional Maritime

Keywords: Trust, Stability, Professionalism, Scale

Concept B: Modern Maritime

Keywords: Innovation, Technology, Efficiency, Future-Focused

Concept C: Global Trade Network

Keywords: Connectivity, Commerce, Movement, International Reach

Deliverables

Generate:

1. Moodboards
2. Colour palettes
3. Typography directions
4. Photography styles
5. Material and texture inspiration
6. Brand adjectives
7. Visual reference systems

Do NOT generate:

- Wireframes
- Homepage layouts
- Components
- Navigation structures
- Animations
- Website sections

Focus entirely on visual identity and creative direction.
