

RANGE SHIPPING WEBSITE REDESIGN

CREATIVE DIRECTION & MOODBOARD GENERATION

Use the attached Design Positioning document as supporting context.

Your task is NOT to design a website.

Your task is NOT to create pages, layouts, wireframes, navigation systems, user journeys, or animations.

Your task is to act as a Creative Director and Brand Designer and establish the visual identity, atmosphere, mood, colour direction, typography direction, and creative language for the future redesign of Range Shipping.

COMPANY CONTEXT

Range Shipping is a London-based dry bulk shipping company operating globally within the dry bulk chartering market.

The company wants to reposition itself as a trusted, globally active, sophisticated commercial operator that inspires confidence among:

- Charterers
- Shipowners
- Commodity traders
- Shipping brokers
- Investors
- Business partners

The company wishes to appear larger, more established, more international, and more commercially capable than the current website communicates.

The redesign should create an immediate impression of professionalism, scale, operational expertise, global reach, and long-term reliability.

BUSINESS MESSAGING

The company's revised messaging focuses on:

- Fully Integrated Dry Bulk Operators
- Global Dry Bulk Chartering
- Sustainability & Environmental Responsibility
- United Nations Sustainable Development Goals
- Sale & Purchase Expertise
- Operational Excellence

- Commercial Intelligence
- Long-Term Partnerships
- Trust & Transparency

The company has handled:

- 2,973,854 MT cargo during 2025
- 118 ports worldwide

These figures demonstrate scale and should influence the overall feeling of the brand.

The visual identity should communicate capability, confidence, and international presence.

OVERALL CREATIVE OBJECTIVE

The final website should feel like:

"A sophisticated global maritime and trading business operating at the centre of international commerce."

It should not feel like:

- A small shipping company
- A generic logistics business
- A WordPress corporate website
- A traditional maritime brochure website
- A yacht company
- A startup

The visual language should communicate:

- Trust
 - Scale
 - Global Reach
 - Movement
 - Stability
 - Expertise
 - Intelligence
 - Professionalism
-

PRIMARY COLOUR DIRECTION

Use the existing Range Shipping logo as the primary inspiration for the colour palette.

The visual identity should be heavily centred around the logo's navy blue colour.

The website should feel unmistakably maritime while remaining modern and sophisticated.

Generate multiple palette variations based on:

Core Navy Foundation

Deep Maritime Navy

Themes:

- Authority
- Trust
- Reliability
- Professionalism

Supporting Colours

Explore combinations using:

- Ocean Blue
- Atlantic Blue
- Midnight Blue
- Steel Grey
- Soft Grey
- White
- Muted Teal

The overall palette should remain elegant, restrained, premium, and corporate.

Avoid:

- Bright blues
- Orange accents
- Neon colours
- Oversaturated palettes
- Startup-style gradients

PHOTOGRAPHY DIRECTION

Generate moodboards showing photography styles only.

Explore imagery such as:

- Open ocean environments
- Dry bulk vessels
- Global trade routes
- Port infrastructure
- International shipping corridors
- Maritime logistics
- Aerial perspectives
- Ocean atmosphere

- Large-scale operations

The imagery should feel:

- Cinematic
- Global
- Sophisticated
- Powerful
- Calm
- Premium

Avoid:

- Generic stock imagery
 - Handshake photos
 - Smiling office teams
 - Staged business photography
 - Low-quality shipping imagery
-

TYPOGRAPHY EXPLORATION

Generate multiple typography directions.

Typography should feel:

- Premium
- Confident
- Modern
- Institutional
- Technical
- International

Explore:

Direction A

Enterprise Corporate

Direction B

Modern Maritime

Direction C

Premium Editorial

Provide font suggestions and explain the emotional feeling each typography system communicates.

VISUAL DESIGN LANGUAGE

Explore design systems inspired by:

- Global trade
- International commerce
- Financial institutions
- Logistics leaders
- Maritime infrastructure
- Enterprise technology brands

The visual system should feel:

- Structured
- Intelligent
- Refined
- Minimal
- Sophisticated
- High-end

Use generous whitespace and strong visual hierarchy.

Avoid visual clutter.

Avoid excessive decoration.

MOODBOARD CONCEPTS

Generate 5 completely distinct creative directions.

Concept 1 — Institutional Maritime

Themes: Trust, authority, industry leadership, reliability

Concept 2 — Global Trade Network

Themes: International commerce, connectivity, worldwide reach

Concept 3 — Modern Maritime

Themes: Innovation, efficiency, technology, future readiness

Concept 4 — Ocean Intelligence

Themes: Data, navigation, precision, operational expertise

Concept 5 — Premium Commercial Shipping

Themes: Sophistication, professionalism, confidence, long-term partnerships

DELIVERABLES

For each concept provide:

1. Colour palette
2. Colour psychology explanation
3. Typography recommendations
4. Photography direction
5. Texture and material inspiration
6. Visual references
7. Brand adjectives
8. Atmosphere description
9. Art direction notes
10. Suggested image examples

Generate rich moodboards and creative exploration.

Do NOT generate:

- Website pages
- Wireframes
- Navigation
- Components
- Hero sections
- Animations
- User journeys

Focus exclusively on discovering the strongest visual identity and creative direction for the future Range Shipping website.
